

BATTERY EXPERT FROM CHINA

Lithium Manganese Dioxide

Electrical characteristics

Nominal capacity (mAh)	340
Rated voltage (V)	3.0
Max. continuous current (mA)	1000
Max. pulse current (mA)	1200
Storage temperature	-20 ~+40 °C
Operation temperature range	-20°C ~+60°C
Weight (g)	5.5
Anode tape/cathode tape	Aluminum/Nickel
Self Discharge Rate	Under 2% for years@30°C
Jacket	Flexible Aluminum Foil Packaging
Max. dimensions (mm)	Φ8.2×57.0

Any special or specific for shape, thickness or discharge rate, please consult GMB.

Key Features

- High Energy Density
- High single cell voltage
- Light weight
- Small Size
- High security
- Stable operating voltage
- Wide Operating temperature range
